REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method of expanding video data to generate a serial word suitable for transmission across an interconnecting cable in a digital visual interface compliant system. The independent claim 1 identifies the distinct features: "encoding a plurality of active video data bits to generate all of the bits other than the two most significant bits of serial word; setting the next to the most significant bit of serial word to a binary level randomly and independently of the active video data bits wherein the next to the most significant bit is determined in response to an auxiliary data stream; and setting the most significant bit of serial word to a binary level determined by a control bit selected from the group consisting of a DC Balance Control bit and a rogue character sequence removal (INV) bit". The closest prior art, Shim et al. (US Patent No. 6,281,815 B1) and Kalra et al. (US Patent No. 6,490,627 B1), either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trang U. Tran whose telephone number is (703) 305-0090. The examiner can normally be reached on 8:00 AM - 5:30 PM, Monday to Friday.
